Mr. T. C. CAMPBELL has brought suit against the German West End Building Association, in which he avers that the officers have loaned money to parties outside the Association, and when money was advanced to shareholders and mortgages taken therefor before the shares were due, have, in certain cases, canceled the mortgages without the repayment of the money before the shares were paid to the other members, thereby depreciating their values. He also holds that the capital shares \$400 each should have been paid some time since, but have not been paid. He asks for a restraining order, which has been grant-ed, and that a Receiver be appointed.

WOOD'S THEATER.-There was a good audience at each of the performances at audience at each of the performances at this house yesterday afternoon and evening. In the play, "No Thoroughfare," M. Fechter as "Obenrizen" certainly gives a most vivid portraiture of the daring, unscrupulous villain whose one redeeming trait is his great, unselfish love for Margurite. At the matinee today, "No Thoroughfare," will be repeated. This evening, as "Ruy Blas," M. Fechter will terminate his engagement.

will terminate his engagement.

Next Monday evening, Mrs. Rachel
Macauley, supported by the best talent
of the stock company, will open with
the spectacular play, "Sea of Ice."

Spontaneous Combustion of Hay.

We trequently hear of extensive confingrations caused by the spontaneous combustion of hey. The prevention in such cases is as simple as it is cheap. Combustion in hay can arise from only one cause—the dampness of the hay. This may arise from the condition of the hay when put into the barn or warehouse because of an insufficient curing, and by because of an insufficient curing, and by the hay being wet by exposure to rain. The precaution is one which nearly ey-ery old farmer knows of. If a liberal quantity of coarse salt is sprinkled through the mow it will invariably pre-vent the heating which causes combus-tion. The same method will save pre-served hay put on board a ship, partial-ly wet. This experiment was tried on board the ship Lancashire in 1847, with perfect success. City Auditor's Report

CHICAGO, May 18, 1870. I put in ten March Patent Grates (with Iron Mantels) in two new houses I built on Michigan Avenue, in the spring of 1888. During the winter of 1889 and 1870 are was used in most, if not all, of the grates, in which was burned coke, soft and hard coal, with the most satisfactory results. I have in other houses in this city most all other kinds of, grates, none of which I consider equal to the March Patent. In point of convenience when not in use, it is unsurpassed. The construction for acting is very simple, and remains perfect from use.
